

## COMPANY PROFILE

Dear Customer,

JData is an Information Technology company dedicated to software development for freight, warehouse logistics and inventory.

It offers proprietary software solutions developed in its own laboratory by analyst and programmers with over 20 years of experience.

To complete its offer, JData offers all the products needed for automatic identification (including terminals, printers and barcode readers), consumables (labels, tags and ribbons) as well as all the connected assistance and maintenance.

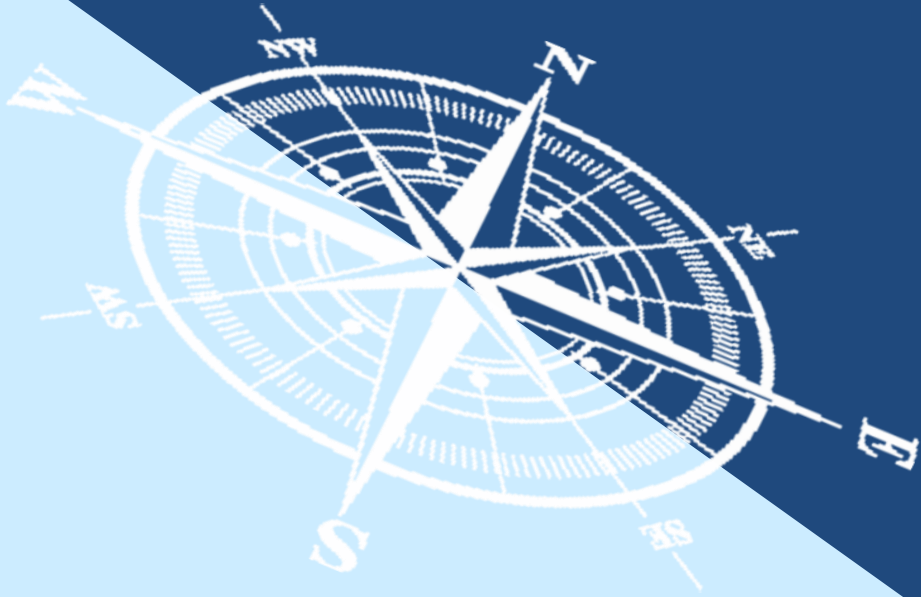

In the following pages, we explain our business reality and the added value we are offering to our Customers.

**We've changed the way to do logistics.**

**Gaetano La Fragola e Luca Sartori**

*CEO e General Manager of JData*

Handwritten signatures of Gaetano La Fragola and Luca Sartori in black ink.
